THE INSECTS SCORED.

THE INSECTS SCORED.

They couldn't do much with Ames, though they, found him for one or two infield punts, but he presented them with three bases, and Wells and Berte made an error apiece, and two of the insects crawled over the plate.

The champions lined out sixteen more runs in the subsequent innings, but no very brilliant playing was done. The boys seemed to be a little sore from the hard work they have been undergoing during the past week, and no doubt this had a good deal to do with their semisiothful movements. As soon as their muscles harden, they are bound to improve, and will no doubt play is per cent, better when they tackle the National League clubs next week.

Everybody knows what Eerte and Jake can lo, and they are good criterions by which to gauge the playing of the other men. Both of these stellar players were slower yesterday than was their custom better week and both mode on error. This

men. Both of these stellar players were slower yesterday than was their custom last year, and both made an error. This was largely due to their want of practice, and not one of the rooters but firmly believes that they will improve with practice. Therefore it is only natural to presume that the other players, whose muscles have had the same seven months in which to relax and soften, will also improve with practice. improve with practice

THEY NEED PRACTICE. It was very apparent throughout yes-terday's game, that the birdings needed practice, but they all clearly demon-strated that they are first-class ball players, and there is every reason to

CAPTAIN W. S. M'NEIL. (Richmond College Team.)

(Richmond College Team.)
believe that the Richmond team of 1896
is stronger than that of 1895.
Anent this, it might also be said that
the College Spiders are a great deal
stronger this year than they were last,
and Ellyson pitched a game which would
reflect credit on an old leaguer. True,
he was hit quite hard, but that was to
be expected, as he was up against
seasoned timber, and he had not expected, as he was up against

wood butted him quite freely, lining out five singles out of six times at the bat, and Pender made four hits—a triple, a double, and two singles—out of five op-portunities, but these two old stand-bys have enviable batting records against greater pitchers than ever graced a col-lege diamond.

The game, save an exhibition of what the Planes.

The game, save an exhibition of what the Richmond lads can do, was largely the Richmond lads can do, was one-sided in the extreme, as the following score

will demonstrate: RICHMOND.

at West-End Park, and the Bluebirds at West-End Park, and the Bluebirds will lay off and witness the game. Umpire Wood, one of Bett's licutenants, officiated at yesterday's game, having come on here earlier in order to umpire the series of exhibition games. He was somewhat off in his judgment of balls and strikes, but he appears to be a fair-minded man, and will no doubt do good work this season.

M'CABE'S BOYS WIN AT ASHLAND.

The Lads Run Up and Capture & Game from Randolph-Macon.

McCabe's team journeyed up to Ashland yesterday, to meet the team of that mposed of Randolph-Macon and Ashland players, and defeated them in an Ashland players, and defeated them in an exciting contest, by the score of 9 to 4. "Wizard" Withers pitched a fine game, and was ably supported by Thorpe, and the rest of the team. The defeat of the home nine was due to the superior teamwork and terrific batting of the visitors. Gordon fielded his position splenddly, and also led his team in hatting, with a double and a triple. Scott and Withers also showed up well with the stick. The fielding of Hines, right-fielder on McCabe's, and Kerr, of the Randolph-Macon-Ashland team was especially good. Appended is team was especially good. Appended is M'CABE'S.

A DISTRESSING ACCIDENT. Lady Burned to Death Near Neapolis.

DANVILLE, VA., March 28 .- (Special.)-A distressing accident occurred at an early hour this morning on the Halifax road, just beyond Neapolis, by which Mrs. Sarah W. Berryman, a most esti-Mrs. Sarah W. Berryman, a most estimable lady, lost her life. About 2 o'clock, Mrs. Berryman's servant woman and her husband heard a peculiar noise, and got up and went outside of their house to investigate. Finding nothing they started to re-enter their room, when the woman heard her employer call her, and on going into Mrs. Berryman's room discovered her near the partially open door, clinging to that and a wardrobe, her clothing having nearly all been burned from her person and the remainder still from her person and the remainder still in a blaze. The colored woman threw some water on the lady, when the latter fell to the floor and expired in a very short time without speaking.

SUPPOSED CAUSE.

An affliction with which the unfortunate woman suffered prevented her sleeping in a bed and she passed her nights in a chair. A wrapper which she wore became ignited, it is supposed, by a spark from the fireplace, and the fire had made great progress before Mrs. Berryman was awakened. The lady's chair was considerably charred, and portions of her dress were clinging to it.

A NATIVE OF DANVILLE.

A NATIVE OF DANVILLE.

Mrs. Berryman was born in Danville, August 29, 1823, and in October, 1837, mar-ried Professor William I. Berryman, of Buckingham county, a prominent educa-tor of his day, and at one time president of Roanoke Female College, Danville, ased was a consistent member of the

POISONED HIS FATHER. Overdose Only Thing That Saved

Latter's Life.

WINSTON, N. C., March 28.-Dr. J. W. Ring, a practicing physician and druggist, and one of the leading citizens of Elkin, Surrey county, and several members of his family, have been critically ill for several days. It is announced to-day that their sickness was caused by an attempt of the doctor's 16-year-old son to poison of the doctor's fe-year-old son to poison his father by putting arsenic in a pre-scription which the young man—a clerk in a drugstore—was given to fill. One of the State's leading physicians, who was summoned to Eikin to see Dr. Ring and his family, says that an overdose of the poison is the only thing that saved their lives. The son's average for his action was lives. The son's excuse for his action was that he wanted to kill his father because he did not allow him such privileges as he thought he deserved. To prevent his arrest, the father gave the son money, and sent him to the far West.

Weldon and Vicinity. WELDON, N. C., March 28.—(Special.)— Another Virginia couple has been here in search of a marriage license, the con-tracting parties being Mr. B. A. Hatchett and Miss Rosa T. Dugan, both of Peters-burg. The necessary papers were pro-cured, and Rev. P. N. Stainback perform-

ed the ceremony.

Bishop Cheshire passed through Weldon to-day en route to Ringwood, where he will preach to-morrow. The Bishop will be here Wednesday night.

Rev. W. S. Black, presiding elder of this district, went down to Haywood's to-day, where he holds second quarterly conference with that church to-morrow.

A large lot of horses and mules were gold at Roanoke Rapids to-day. They were used for excavating purposes, and, the excavating being completed, the company sold the teams off at public auction.

CASE OF MR. GRIMES. The Common Council Will Yote Upon His Expulsion To-Morrow Night.

THE RAILROAD VIADUCT SCHEME.

Street Committee to Consider It Tuesday Afternoon-Water Depart-Ment Contracts Awarded - A Plumber Refused License.

The Common Council will meet at 8 o'clock to-morrow night for the purpose of considering and voting upon the resolution expelling Mr. John R. Grimes, of Marshall Ward, from membership in that body. This will be one of the most important of the closing scenes of the recent long and tedlous investigation of the affairs of the City Gas-Works. It is well known that the report of the special committee contained certain conclusions, which amounted to charges the Marshall-Ward member. which the Council decided Mr. Grimes should be given an opportunity to disprove. Three evenings of last week were devoted to hearing testimony for the defence, which was concluded on Wednesday night, and was of favorable na-Considerable interest in being manifested in the probable result of the inquiry, and it is pretty generally be-lieved now that Mr. Grimes will not be expelled, but will only be subjected to a vote of censure by the Council. There seems to be a difference of opinion as to the vote necessary to expel or cen-sure a member; but it appears to be clear that only a majority is necessary THE PROPOSED VIADUCT.

The Street Committee will convene in regular session at 5 o'clock to-morrow afternoon in Room No. 5 of the City Hall, and, at the same hour and place, on Tuesday, it will hold a special meeting to continue its consideration of the ordinance allowing the Chesapeake and Ohlo Railway Company to build its proposed steel viaduct through the One of the principal points of objection to the erection of the overhead structure as contemplated by the Chesapeake and Ohlo has been raised by Davenport & Morris, who have a large warehouse at the corner of Seventeenth and Dock streets. At this place the dock is considerably enlarged, so as to permit ships to turn around and be loaded and unloaded. By the plans of the railroad, if the new scheme is carried out, it is to floor over a part of this basin, run the tracks across the northwest corner, and thereby cut off the wharfage at that exact point. The company's drawings contemplate such an extension of the basin, so it is claimed, as to give ample room for loading and unloading the ves-sels, just south of the point where this is done at present. Messrs, Davenport and Morris also con-

tend that as their warehouses in that vi-cinity are built upon driven piles, they would be seriously shaken up by passing trains, and that they would be greatly annoyed in the upper part of their build-ings by smoke from the locomotives. The meeting Tuesday afternoon will be of special interest.

WATER-DEPARTMENT CONTRACTS. A lengthy session of the Council Com-mittee on Water was held at the office of Superintendent Bolling last evening. of Superintendent Bolling last evening. Those present were Chairman Briggs, and Messrs. Bahen, Lawder, Mountcastie, Tanner, and Trower. The committee was addressed by Mr. Joseph W. Laube, who asked for water for Mt. Calvary Cemetery, on Randolph street, He presented a petition in this connection, which was signed by a number of section-owners. On motion of Mr. Trower, the Council was urged to adopt a resolution complying with the request. with the request, Mr. Charles H. Cosby, who had applied

to the Superintendent for a plumbing li-cense and been refused, appealed to the committee, who sustained the Superin-Tie pay-rolls and bills of the depart-

ment were approved.

Extensions were ordered as follows: On Marshall street, from McKinney to Bowe; on N, from Twenty-fourth to Twenty-fifth.

A new fire-plug was directed to be placed at he corner of Twenty-eighth and Franklin streets, Contracts were awarded as follows: Fire hydrants and lead, to Smith-Courtney Supply Company; valves, jute, and solder, to the Southern Railway and Supply Company; specials, and large stop-cock boxes, to Tredegar-Works; small boxes, to Cardwell Machine Company; paving, to John C. Weinbrunn; trench-digging, to Maynard & Co.; brass-work, to the Southern Railwsy and Supply Com-

pany.

The Superintendent was instructed to ask for bids for insuring the boilers at

ask for bids for insuring the boilers at the steam-pumps.

The Tredegar Company was awarded the contract for making two new plungers for the new pumps, and to have certain other repairs made at the new pump-

plaintiff.

WILL LET THE JURY SAY. Kene's Case Certified to the Grand Jury-Other Court Matters.

The preliminary examination held in the Police Court yesterday in the case of James Kane, charged with the murder of his wife, resulted in the accused being sent to the grand jury. Judge Crutch-field thought the case was one of too great importance for him to take the responsibility of deciding it, though the evidence did not indicate that Mrs. Kane's death resulted from a blow dealt by her

husband.

The hearing of this case attracted a large crowd to the court-room. Mr. George E. Wise conducted the prosecution for Commonwealth's-Attorney Smith, and Messrs. Richardson and Maury appeared for the accused. The examination lasted two hours, but there was practically no new testimony. Policeman Hulcher was first put upon the stand, and stated the facts in connection with the arrest of Kane for beating his wife, and Mr. Layender, who lived in the house

and stated the facts in connection with the arrest of Kane for beating his wife, and Mr. Lavender, who lived in the house with the Kanes, followed the policeman, but could give only a confused statement of what he had seen, contradicting himself as to the time he saw the husband shove his wife.

Bertie Kane gave the same testimony that was given before the Coroner's inquest, which was to the effect that her father struck her mother Wednesday night. She was positive that no lick passed Friday night, when the arrest was made. Bertie said that her father was drunk Friday night, and made threats at her mother, but that she was in the room the whole time, until sne and her mother went across the street to get some one who would go for an officer, as they were afraid of the intoxicated man, and she saw no lick passed.

Dr. Wellford stated that the woman died from peritonitis, and that no bruises, save those on the face, were visible on the body, and that the post-mortem examination held showed no signs of bruises likely to occur from a kick in the abdomen. Dr. Wellford sald, however, that peritonitis could have resulted from a lick, and yet the marks or bruises from the lick might not be visible. In this

point Coroner Taylor corroborated the statement of Dr. Wellford. The case was sent on without argument.

NOT A PRIZE-FIGHT. NOT A PRIZE-FIGHT.

hTe alleged prize-fighters, Harvey Sydnor and Edward Tulley, were prisoners in the Police Court yesterday morning. They were pinced upon the stand, and both swore that the affair was in no wise a prize-fight, but that they were on good terms, and simply wanted to see who was the best man. Young Sydnor claimed that they was control that they was control to the standard of the claimed that it was only a

claimed that it was only a sparring match, whereupon the Justice began to ask questions.

Everything went to show, however, that the boys had simply made arrangements at Murphy's Hotel about a week prior to the affair over Whitlock's tailoring establishment, and had fought only a few minutes with bare fists. The Justice dismissed the case, but informed the young aspirants for puglistic fame that the law was heavy on such offences if proved contrary to the law, but that in this case no law had been violated, as no admission had been charged for the spectators, nor was any purse at stake for the winner.

OTHER CASES HEARD.

George Harris alias Skillett, who was

George Harris alias Skillett, who was on Friday convicted of firing a pistol in the street at two officers and two citizens, and sentenced to tweive months in jail, besides being fined \$100, was again in the Police Court yesterday on the charge of attempting to kill these gentle-men. The case was dismissed.

Maggie Davis (colored) was sentenced to four months in the jail for having in her possession twenty yards of cloth, she knowing the same to have been stolen. After being committed to th

After being committed to the prisoners pen, Margie was seized with a fit, and the ambulance had to be summoned. She was taken to the almshouse, but will go to the jail as soon as she is able, which will probably he this morning. Maggie was also required to give \$300 security for twelve months.

John F. Morrissett presented himself before the Justice, and asked to be given ten days in jail. The Justice looked a look of gratitude, and said, "Why, certainly, you can have fifteen." But the man protested that ten was sufficient to sober him up, so the Sergeant entered up a charge of drunk in court, and sent John down for the ten days. down for the ten days.

John Willis and Grant Harris, old negro crooks, got enough sentence for petty thieving to last them some little time. As a starter, the Justice required \$300 security for twelve months for both men, and, besides this, they got four months each for stealing Mr. Lovenstein's hat. each for stealing Mr. Lovenstein's hit.

Harris was caught with stolen goods in
his possession, which gave him four more
months, while Willis was convicted of an
"open-and-shut" case of stealing a watchcharm from S. Crowell, and then four
months was added to his term.

Yung Lung, a Chinaman, was an important witness in these cases, and testified that the thieves wanted him to purchase the goods they had stolen, but as he was unwilling to invest more than 15

SHADOWGRAPHS IN SURGERY.

Opinions of Two Prominent Mem-

bers of Medical Profession. of Surgery in the College of Physicians and Surgery. New York city, in speaking of the value to medicine and surgery of Roentgen's discovery, said: "As usual, the entire civilized world has enthused over a discovery, the beneficial results of which to humanity are now only pre sumed. I am, however, of the opin that it will take some time to dev this application of 'X'-rays. At pre the results attained do not promise any-thing of great value to advanced sur-gery. Of course, the shadowgraphs of gery. Of course, the shadowgraphs of hands, which are now exhibited every-where, may be made useful in some branches of the profession, but in com-parison with the vast revelations which the X-ray impressions of the brain, the rax, and abdomen would effect, only the rudiments of the discovery have been

the ridiments of the discovery have been reached thus far.

"Take, for instance, a case of appendictis. If I could get a photographic impression exhibiting the exact state of inflammation of the little vermiform appendix, also showing the situation of whatever intestinal adhesions there might be, and the quantity of pus in the discovery contractive. I should be relieved from eased appendix, I should be relieved from much brain-work, and should feel more positive of the minor details of my di-

agnosis. "Applied to internal concerns, if the different density of certain conditions of tissues should be manifested in the impressions on sensitive plates, surgeon would cease to be puzzled in the cases; at present a certain degree of uncertainty is unavoidable. Such seem to be the remote possibililies of the fu-ture development of Roentgen's discovery, and if all this is realized it will be the most important knowledge ever placed at the disposal of medical science. It might then even be pronounced the first insight into the hidden mysteries of life,

or a guide to the future solution."

Dr. Paul Gibier, of the New York Pasteur Institute, said that he had not as yet been able to see practical demonstrations of the application of Xrays to the human form in diseased con-

"But, how about the possibilities?" I

"Ah-the possibilities-well, I should say that they are very encouraging. It think the new rays have in them a potency which may revolutionize medi-cine and surgery; but the question is, Will men be able to master and direct them? That is the point that must be demonstrated before a positive state-ment can be made by any conservative ment can be made by any conservative scientific man. I admit that it is quite likely that this invisible influence may prove sufficiently potent to localize tumors and other equally dangerous foreign matters in the human body; but the science is in its infancy, and doubtless must pass through its seven ages, the same as man, before it can command high honors from the world. It must be developed.
"It is a serious question in my mind "It is a serious question in my mind as to whether the relative density of the

tissues will establish a sufficient distinc-tion between the different organs, when the experiments arrive at the point where tissues will establish a sufficient distinction between the different organs, when the experiments arrive at the point where they can obtain shadowgraphs of the body. Of course, all dead matter or broken-down tissue is denser than healthy matter, and the suggestion seems not impossible. As regards the possibility of locating bullets in the brain, I take this to be the most difficult of all. If the shadowgraphing of the liver, heart, or the spleen is demonstrated to be merely a matter of a variation of shade—assuming, of course, that the body may be shadowgraphed—then the same process may be applied to the brain. It is quite possible that even the two thicknesses of bone to be penetrated in the latter instance may prove less obstructive than the foreign body, and so locate it. But even in case this proves true, it will be necessary to make two shadowgraphs. One would only locate the foreign matter from one point of view, and a cross-section would have to be made to get the exact position of the bullet, which would be very exhausting to the sufferer, unless it could be done very quickly.

"If the efforts now in progress to force this strange influence through the thicker parts of the human form are crowned with success, it seems perfectly consistent to assume that metallic substances could be readily localized. The introduction of the rays at the front and side of the thorax, or chest, should exhibit the point of intersection of the two lines of rays, giving accurate measurements of location, which would enable the surgeon to introduce the probe and extract the foreign matter without hesitation. At present, he must search in the dark, under an extreme 'needle-in-a-haystack' condition."
